

# EDM`08

## Montréal, Canada

### First International Conference on Educational Data Mining *Data Mining and Statistics in Service of Education*

Call for papers

<http://www.EducationalDataMining.org/EDM2008.html>

June 20-21, 2008

Co-located with International Conference on Intelligent Tutoring Systems (ITS 2008)

The First International Conference on Educational Data Mining brings together researchers from computer science, education, psychology, psychometrics, and statistics to analyze large data sets to answer educational research questions. The increase in instrumented educational software, as well as state databases of student test scores, has created large repositories of data reflecting how students learn. The EDM conference focuses on computational approaches for using those data to address important educational questions. The broad collection of research disciplines ensures cross fertilization of ideas, with the central questions of educational research serving as a unifying focus. This Conference emerges from preceding EDM workshops at the AAI, AIED, ICALT, ITS, and UM conferences.

#### Topics of Interest

We welcome papers describing original work. Areas of interest include but are not limited to:

- **Improving educational software.** Many large educational data sets are generated by computer software. Can we use our discoveries to improve the software's effectiveness?
- **Domain representation.** How do learners represent the domain? Does this representation shift as a result of instruction? Do different subpopulations represent the domain differently?
- **Evaluating teaching interventions.** Student learning data provides a powerful mechanism for determining which teaching actions are successful. How can we best use such data?
- **Emotion, affect, and choice.** The student's level of interest and willingness to be a partner in the educational process is critical. Can we detect when students are bored and

uninterested? What other affective states or student choices should we track?

- **Integrating data mining and pedagogical theory.** Data mining typically involves searching a large space of models. Can we use existing educational and psychological knowledge to better focus our search?
- **Improving teacher support.** What types of assessment information would help teachers? What types of instructional suggestions are both feasible to generate and would be welcomed by teachers?
- **Replication studies.** We are especially interested in papers that apply a previously used technique to a new domain, or that reanalyze an existing data set with a new technique.

#### Important Dates

- Paper submissions: March 31, 2008
- Acceptance notification: April 30, 2008
- Camera ready paper: May 16, 2008
- Conference: June 20-21, 2008

#### Submission types:

- Full papers: Maximum of 10 pages. Should describe substantial, unpublished work.
- Young researcher: Maximum of 8 pages. Designed for graduate students and undergraduates.

#### Conference organization

- Conference Chair: Tiffany Barnes
- Program Chairs: Ryan S.J.d. Baker  
Joseph E. Beck
- Local Arrangements Chair: Michel Desmarais
- Web Chair: Arnon HersHKovitz

## **Program Committee**

- Esma Aïmeur, University of Montreal, Canada
- Ivon Arroyo, University of Massachusetts Amherst, USA
- Bettina Berendt, University of Berlin, Germany
- Janice Gobert, Worcester Polytechnic Institute, USA
- Neil Heffernan, Worcester Polytechnic Institute, USA
- Judy Kay, University of Sydney, Australia
- Kenneth Koedinger, Carnegie Mellon University, USA
- Brent Martin, Canterbury University, New Zealand
- Noboru Matsuda, Carnegie Mellon University, USA
- Gord McCalla, University of Saskatchewan, Canada
- Bruce McLaren, DFKI, Germany
- Tanja Mitrovic, Canterbury University, New Zealand
- Cristóbal Romero Morales, Cordoba University, Spain
- Mykola Pechenizkiy, Eindhoven University of Technology, Netherlands
- Carolyn Rosé, Carnegie Mellon University, USA
- Sebastián Ventura Soto, Cordoba University, Spain
- Steven Tanimoto, University of Washington, USA
- Silvia Viola, Università Politecnica delle Marche, Italy
- Kalina Yacef, University of Sydney, Australia
